

Preferred End-User Channels to Access Information

This document provides links to the various professional networks, organisations and technical media listed by ca. 50 interviewed stakeholders as their preferred information sources on the topics of contaminants of emerging concern (CECs), pathogens and antimicrobial resistance (AMR). The document is divided by country (EU-level, France, Germany, Sweden). For specifics on the channels that individual end-user groups (regulators, industry, water operators, solution providers, researchers) use to access information, visit the [TransNet Viewer](#).
